EDUCATION

Ballari Institute of Technology and Management

B.Tech in Data Science

CGPA: 9.18

2025 – 2029

Bellary, India

TECHNICAL SKILLS

Focus Areas: Data Science, Machine Learning, Embedded Systems

Programming: Python, Java, SQL, HTML, CSS, JavaScript

Libraries / Frameworks: Flask, scikit-learn (TF-IDF, Logistic Regression), SQLite

Tools / Hardware: ESP32, Arduino Uno, WiFi module, sensors (temperature, heart rate/SpO2, gas/smoke)

PROJECTS

Single Solar Tracker Axis

Tech: Python, Flask, TF-IDF, Logistic Regression, SQLite

- Built a web application that classifies weather using TF-IDF features and a Logistic Regression model.
- Stores submissions and results in a SQLite database and generates a shareable link for each result.

Gas Leakage and auto shut-off system

Tech: Arduino Uno, sensors

- Built a website to detect fake or adulterated ingredients by searching a product by name or barcode.
- Matches ingredients against a registry of banned and caution-tier additives to flag harmful products.

DIY Smart Ward

Tech: Arduino Uno, WiFi module, sensors, LCD, buzzer

- Built a ward monitoring system that tracks body temperature, heart rate/SpO2, and room air quality (gas/smoke).
- Gives real-time alerts through an LCD display and buzzer.

FleetTrack – Driver Attendance and Account Management App

Tech: HTML, CSS, JavaScript, localStorage

- Built a multi-driver attendance and account management web app with hashed authentication.
- Implemented auto-absence logic and persistent data storage in the browser.

Iron-Salt Redox Flow Battery (Fe-RFB)

Tech: Sustainable Chemistry for Energy Devices module; HTML simulation

- Covered the full electrochemical theory, a cost breakdown in INR, and an interactive HTML simulation.

Personal Portfolio Website

Tech: HTML, CSS, JavaScript

- Designed an animated portfolio site showcasing five projects across ML, Data Science, Embedded Systems, Web Dev, and Energy Devices.

Other Python Projects

Tech: Python

- Stock Market Simulator, Bus Reservation System, and Expense Tracker, each with a project report and presentation.

CERTIFICATIONS

-
- Probability and Statistics and Data Science — Infosys (course completion)

- Python Bootcamp
- SQL Bootcamp
